Dear Dra Figueiredo

c/c. Sr. Nestor Ribeiro

We have not met so I would first like to introduce myself. My name is Murray Walker and it has been my pleasure to do the English language commentaries on the Macau Grand Prix since 1982. As such I have seen, as I am sure you will appreciate, many changes!

The reason I am writing is because, owing to the need for a hip-replacement operation, I was not able to do my usual commentary last year and therefore felt you might be interested to hear my observations on the dramatic alterations I found on my recent visit.

I was immensely impressed with the new control centre, garages, media centre and paddock. My commentary life working for the BBC, Channel Nine in Australia, CBC, SABC and other broadcasters takes me all over the world and I can honestly say that I have seen no facilities at Grand Prix circuits that are better than those at Macau and very few that are their equal. I therefore congratulate everyone concerned with their erection and operation. They have every reason to feel very proud of their achievement.

May I, too, say how very satisfying it is to work with your producer, Nestor Ribeiro. His job of supervising the preparation for four demanding days of transmissions and then masterminding the actual production is one of great responsibility which I think he copes with magnificently. I always find that the detail work which matters so much in a complicated production of this type has been immaculately done and his grasp and control of the coverage of the actual racing, allied to his good humour, makes him a joy to work with.

I do hope that you and your colleagues were as pleased with this year's programme as I was - and that your many viewers were too!

My kind regards  
Murray Walker
